Operational Reliability Comparison: Client vs. Server Aggregation Outcomes
Client-Rounds (Count)
Successful Client-Rounds
Failed / Dropped Client-Rounds
Server Rounds (Count)
Completed Aggregation Rounds
Aborted Aggregations (Quorum/Timeout)
Exp 1: Baseline
Exp 2: 1 Straggler*
Exp 3: 2 Stragglers*
Exp 4: Dropout
Exp 5: Recovery
Exp 6: Adapt OFF
Exp 7: Nonstat*
*Exp 2 was bounded by 600s wall-clock timeout (4/10 rounds); Exp 3 & 7 experienced CPU thread contention.
